

K-LOVE (91.1 in Denver, CO) is a vital radio station in our city, providing family-friendly and inspirational programming. I started donating money to K-LOVE this year because I believe in its importance and relevance in our local community. During their on-air fundraising drive they told a story of a young woman who was sitting in her room contemplating suicide when she happened upon K-LOVE when she turned on the radio. She had never heard the station before but through listening, and eventually calling in for support, she decided not to end her life. K-LOVE, and its staff, is a source of hope, among many other things, for the community and helps save lives every day!

I'm writing to recommend that you **DO NOT require community advisory boards**. I believe it will be hard for the boards to remain neutral when it involves their opinions/feelings regarding religious radio stations.

I also recommend that you **DO NOT require additional staffing**, which would add tens of thousands of dollars in additional expenses, possibly resulting in the shutting down of smaller facilities.

Finally, I ask that you **DO NOT force translator stations off the air**. This rule would adversely affect K-LOVE and force many of its translators to cut off their K-LOVE programming.

Thank you for your time.
